RECENT WORK

November 2017 — Present

CTO & LEAD DEVELOPER STRYV

- Supported founder with defining scope and design of the product.
- Managed day to day product backlog.
- Spent the majority of my time building a Progressive Web App (PWA) using Ionic 3 & 4 with a backend API built using Laravel.

June 2011 — January 2018

CO-FOUNDER AND CTO PINPOINT SOFTWARE

- Built the MVP of our flagship product (datecheckpro.com) in 6 weeks.
- Continued to plan features with management and customers to quickly iterate.
- Architected and built our second application (taskle.com) using Symfony and Ionic 3.
- Reimagined and rebuilt Date Check Pro on a new platform (Laravel & Ionic 3).

Full work history and references available upon request.

NOTABLE PROJECTS

- **Core Values (Laravel)** github.com/geekitycom/core-values
- **Time Tracking Demo (React)** github.com/andrewshell/time-tracking-demo

SKILLS

For fifteen years I've been building a wide variety of web applications. Much of my work has been with **PHP**, but I've also worked extensively with Angular and the Ionic Framework. Most of my recent development has been with **React**, **Redux**, **Laravel**, **Ionic 4** and **Angular**.

I'm incredibly comfortable **learning new things quickly** and **working with ambiguity**. I always consider the **goals of the business** before I work. The best way to be productive is to avoid spending time building the wrong thing.

I've spent a lot of time **speaking in public** as well as **teaching** groups and individuals. **Communication skills** are one of my best assets. I enjoy **coaching and mentoring** others.

HONORS & ACTIVITIES

- Zend Certified Engineer (PHP 4 & 5)
- Organizer of Madison PHP
2004—2008, 2010-2013
- Co-Organizer of Madison PHP
2013-Present

EDUCATION

HERZING COLLEGE, MADISON WISCONSIN

- B.S. Technology Management
December 2006
- A.S. Computer Information Systems
October 2003
